Subject:	CISM Report	Agenda#	7
Author:	capt. Tamás BÁNSZKI, President CISM Parachuting Committee		
Date:	22 November 2024	Pages:	1

CISM report to 75TH ISC Plenary

1. CISM 2024

The 46th CISM Military World Championship was held in Hungary from 02nd -13th July. It was a well organized event and we were very lucky as the weather during this period was beautiful. Some FAI records were broken in the accuracy discipline (team 0,22cm G-1 and 1,0.00+0,02 G-1, individual 0,05cm). Unfortunately several other continental FAI records could not have been claimed, as the participants held expired FAI Sporting Licences. (ALG, BRA, CHN, UAE)

During the World Championship, we used live judging and publishing systems (Airshots and Intime) for both for the Accuracy and Style jumps and for results publication. It was interesting for competitors and observers.

ISC President Alberto Martin Paracuellos attended the entire 46th WMPC and we again confirmed the positive ISC-CISM relationship - Thank you Alberto.

CISM is also proud of the many outstanding results and medals that our military athletes have achieved in 2024 during the FAI S&A WPC in Prostejov.

2. CISM 2025

The main event in 2025 will be the 47th World Military Parachuting Championship 13th -23rd November in Doha, Qatar.

Also in 2025, the Swiss Armed Forces will be organising the 5th Winter Games, 23rd-30th March in Lucerne, Andermatt and Engelberg. As part of this competition the 2nd CISM Parachute-Ski Military Wrlld Championship will take place.

We are planning to conduct a training seminar for beginners and licenced judges in May 2025 in Pisa, Italy. This plan is not formally confirmed by the Italian Armed Forces, but perhaps we will know more during the Plenary in Rome, and whenwe have confirmed information and dates it will be coordinated with ISC JC.

3. CISM 2026

There is no confirmed host nation for 48th WMPC in 2026 yet. As soon as we have a potential applicant nation, the date it will also be co-ordinated with ISC.

Blues skies and
Friendship through Sport:
