All the FAI/ISC officials will be accommodated at the MERCURE.

2.20 Details of all Judging and Scoring Equipment to be provided

This world cup is the perfect opportunity to introduce live judging for FS. With several years of experience and a dozen competitions under our belt –both private events and official ones such as the French and British national championships– we have become well-versed in live judging and are fully capable of supporting a first international event judged live in formation skydiving.

As pioneers in this new mode of judging FS, and with this bid concerning a World Cup rather than a championship, we believe we are the perfect facility, and this is the ideal opportunity to take the step towards live judging on an international scale.

At the time of submitting this bid, the organiser is aware of the work to be done with the judges' and the FS Committee to make the live format compatible with

the ISC standards. The organiser proposes to keep this option and to work in 2025 on a proposal for rules that would be acceptable as a test by the ISC. Failing that, if there is no agreement or no acceptable solution, **the current way of judging would be maintained** : the tunnel still can be equipped with its usual set up and **Intime** judging system for indoor competitions.

2.21 Details of Public Address system to be used : WEEMBI electronic set up

2.23 Safety

FFP/WEEMBI will arrange for a full time first aid support, paramedics and doctor on site. Ambulance and emergency services will be available in connection with Lille Hospital.
