As long as I can remember model airfields have been my second home. Even as a small child, I was enthusiastic about model airplanes. Thanks to my father's activities in model flying and my brother's successful activities in the F1B free flight class, my own goal was clear. When I was finally old enough to take part in competitions, I started my first activities and competitions in the F1H class and also beginner classes with remote control. In 2018 I started in the F1A free flight class and also took part in international competitions before starting the F1B class in 2019. Here, my first participation in the World Cup in Prilep 2019, I made it to the top and took 2nd place among the juniors and at the same time 3rd place among the seniors. Since then I have been very active successful at international Model Flying World Cups. In 2021 I took 1st place overall in the F1B Junior World Cup.

Interrupted by the Covid-19 situation, I was only able to qualify for the German Junior team in 2022. The following year, 2023, I took 1st place and became Junior European Champion in the F1B class. I proudly qualified for the Junior World Championships and the European Senior Championships in 2024 and was therefore able to take part at two international free flight championships, one after the other. I took 7th place at the F1ABC European Championships in Romania and then 5th place in Prilep at the Junior World Championships in North Macedonia.

1/2 Jä.

As a result of the annual ranking, I am in second place in the entire F1B Junior World Cup 2024.

Thanks to my successes in the junior competition; I would like to continue to take part in national and international competitions with my Wakefield models and face the competition.

At the same time, I take every opportunity to pass on my own experience to younger model pilots in free flight and to support them in their activities.

I am currently completing the final year of a work-oriented high school in Dresden and would like to graduate with a high school degree in 2025. I would then like to start a technical degree at the TU Dresden.

The „CIAM AEROMODELLING SCHOLARSHIP“ I hope to get would greatly support me in my study plans and model flight activities. I meet all the requirements and would be very happy about a positive decision for me.
